

SIGECO System

The course management system is a work tool for the handling of course calendars, the assignment of teachers, the management of information relative to students and related data.

SIGECO (Training course planning and management system) can be interfaced with external systems (ex. ERP system, Web Applications, Database), has an email notification manager, and uses a DBMS.

SIGECO allows the management of materials relative to courses, teachers and students.

Training course planning and management system
